

Lotus Filters (the Company) strives to conduct business in ways that produce social, environmental and economic benefits in the communities we operate in.

The Company understands that long-term future success depends upon improving our reputation so we pay particular attention to the demands and concerns of our various stakeholders, while respecting and working to improve the communities and environment in which we operate.

The Company approach to Corporate Social Responsibility (CSR) is structured around four key themes, as outlined below:

1. The environment – we strive to reduce the impact of our services on the environment. This is through: recycling, proper capture and disposal of waste and constantly seeking ways to reduce our overall environmental impact.
2. The community – we aim to operate responsibly in all the communities where we provide our services. In addition we support a number of charities where we provide our services free of charge.
3. Corporate governance - we are committed to a transparent, accountable approach to business across all areas.
4. The workplace - our employees are instrumental to our ongoing success. We are committed to providing a positive and engaging work environment.
